

Selleys Wall Putty

Ready Mixed Acrylic Based Filler

DESCRIPTION

Selleys Wall Putty is a ready-mixed acrylic resin based filler. It is also suitable for use as a smooth plastered coat prior to painting for interior ceilings and walls. It is used to fill up hair line cracks and patch up holes on plastered surface

SUITABLE FOR

Cement plaster, gypsum board, plaster surface.

DIRECTIONS FOR USE

Surface preparation

- Make sure that the surface is clean, dry, free of oil, fungus and other impurities.
- Remove old peeling paint works before applying.

Application

1. Stir thoroughly before use.
2. Application can be done by spatula or by plastic scraper provided.
3. Apply the filler on the crack or hole with generous amount. Remove of the excess.
4. Allow to fully harden for at least 24 hours before sanding. Drying of the putty may vary depending on the thickness applied and environment
